

April 22, 2024

Dear AAPPS-DPP members,

Thank you for your cooperation on AAPPS-DPP activity.

RMPP is now in WoS and Scopus collections.

Until now, 18 articles are published in RMPP.

Article 8: Shantanu Kumar Karkari, Unconventional apparatuses and diagnostic techniques for studying negative ion plasmas in laboratory devices

Article 9: Tae Moon Jeong, On the synergic approach toward the experimental realization of interesting fundamental science within the framework of relativistic flying mirror concept

Article10: Jong-Kyu Park, Correction: Optimizing 3D magnetic perturbations for edge instability control in the KSTAR tokamak

Article11: G. J. Choi, Theory of self-generated vortex flows in a tokamak magnetic island

Article12: Ruilong Guo, Magnetic reconnection in the magnetodisk of centrifugally dominated giant planets

Article13: Ataru Tanikawa, Contribution of population III stars to merging binary black holes

Article14: Mitsuru Kikuchi, Editorial: Reviews of Modern Plasma Physics: Volume 7

Article15: Snezhana I. Abarzhi, Perspective: group theory analysis and special self-similarity classes in Rayleigh–Taylor and Richtmyer–Meshkov interfacial mixing with variable accelerations

Article16: Dominique Franck Escande, Description of magnetic field lines without arcana

Article17: Vladimir V. Kocharovsky, Electron Weibel instability and quasi-magnetostatic structures in an expanding collisionless plasma

Article18: Chaowei Jiang, Developments of a fundamental mechanism for initiation of solar eruptions

Please read through free access from RMPP site with access token provided by DPP.

We welcome more submission to RMPP.

Sincerely yours,

M. Kikuchi, CEO
