

Dear AAPPS-DPP members

Since I announced call for AAPPS-DPP Innovation prize on Feb.1, there is no nomination, yet.

Deadline (March 31) is coming close and AAPPS-DPP Board of Directors seeks outstanding nomination world-wide, and especially from Asia-Pacific region.

M. Kikuchi, Chair & CEO AAPPS-DPP Assoc. Inc.

Dear AAPPS-DPP members

In the ExCo meeting after positive comments from I-HAC meeting in Kanazawa, ExCo decided to launch AAPPS-DPP Innovation Prize.

While S. Chandrasekhar Prize covers application as well, EPS-DPP has similar prize. As a typical example, dry etching (plasma processing) is essential technical breakthrough for semiconductor manufacturing.

Revolutional IoT development is based on data center having huge memory.

There is consensus that plasma technology played essential role in this industrial development.

I am sending call for nomination of AAPPS-DPP Innovation Prize as attached.

Any DPP member can nominate a person who made seminar/ pioneering contribution to any field of plasma applications.

Deadline for this nomination is March 31 same as 2019 S. Chandrasekhar Prize.

Winner is expected to give a plenary talk at AAPPS-DPP 2019 in Hefei.

Sincerely yours,

M. Kikuchi
