

Postdoc positions and phd studentships in solar/planetary radio physics at Shandong University

The Institute of Frontier and Interdisciplinary Science at Qingdao, Shandong University (IFIS-SDU) invites applications for 2 postdoc positions and a few phd studentships in the field of solar and planetary radio physics. The project is to address radiation mechanism of radio emissions using PIC simulations. PhD students are also wanted.

Working place will be at Qingdao campus of Shandong University in China. Salary level for postdocs is around 240,000 - 300,000 CNY per year.

Candidates with experience in MHD and PIC simulations of plasmas and a good knowledge of solar and planetary radio physics are welcome to apply. Applicants must have a PhD in solar and space physics, plasma physics, or a closely-related discipline completed by the time of taking up the post.

To apply, send your resume with selected publications and a list of references to Prof. Dr. Yao CHEN (yaochen@sdu.edu.cn).
